

# INVERTEBRATE COMPATIBILITY CHART

Choosing the right invertebrates for your desktop reef is essential to maintaining a healthy, balanced ecosystem. Each tank has different space, filtration, and stability considerations that impact which cleanup crew members or ornamental inverts will thrive. Always consider bioload, waste production, and aggression.

| Invertebrate         | 40oz Micro Tank | 1 Gallon Small-In-One | 5 Gallon Small-In-One |
|----------------------|-----------------|-----------------------|-----------------------|
| Cerith Snail         | ✓               | ✓                     | ✓                     |
| Sexy Shrimp          | ✓               | ✓                     | ✓                     |
| Blue Leg Hermit Crab | ✓               | ✓                     | ✓                     |
| Micro Brittle Star   | ✓               | ✓                     | ✓                     |
| Copepods             | ✓               | ✓                     | ✓                     |
| Pom Pom Crab         | ✗               | ✓                     | ✓                     |
| Nassarius Snail      | ✗               | ✗                     | ✓                     |
| Trochus Snail        | ✗               | ✗                     | ✓                     |
| Astrea Snail         | ✗               | ✗                     | ✓                     |
| Red Leg Hermit Crab  | ✗               | ✗                     | ✓                     |
| Cleaner Shrimp       | ✗               | ✗                     | ✓                     |
| Peppermint Shrimp    | ✗               | ✗                     | ✓                     |
| Feather Duster       | ✗               | ✗                     | ✓                     |
